

MEGNO

Economical, Durable and Standard

ECONOMICAL DURABLE AND STANDARD

Modular Type Wheel Block

- Two different wheel diameters designed to match wheel load upto 7 ton(Crane SWL 12.5T for short span and 10T for long span).
- Low friction & high resistance to wear, thanks to self-lubricating properties.
- Travel wheel tread width: 55 to 90mm.
- Simple assembly, alignment and suitable for profile section rails, square and rectangular section rails.

End Carriages

- Simple installation, bolted design for easy adjustment.
- Simple pre-assembly, rapid final assembly and simple dismantling, so, no special tools are required.
- Top mounted, semi-top mounted and side mounted with anti-derailing protection.
- Guide plate welded to the steel superstructure of the MEGNO end carriage. This plate guides the MEGNO wheel block, simplifies its alignment in the end carriage and is used to adjust the span.
- Wheel base for end carriage -125 wheel block - 1500 to 4000mm
-160 wheel block - 2000 to 4000mm.

LT Panel Box

- Completely modular type
- Contactor and VFD type
- Required protection type IP54 enclosure for indoor use
- Special purpose crane panels.
